## Summary

Fourth-year Computer Engineering student at Middle East Technical University. Self-motivated, detail-oriented, and creative thinker with strong ability to learn and adapt in team environments. Deeply passionate about creating scalable software solutions, aiming to build a career in a strategic management or technology leadership role. Eager to leverage my engineering background to solve complex business challenges and drive impactful innovation.

## Education

2020 - 2026 **Bachelor of Science in Computer Engineering**, Middle East Technical University, Ankara, Turkey

## Experience

July 2022 - September 2022 **Netax Company**, Software Engineer Intern, İstanbul, Turkey

- Developed and enhanced accounting software modules using ASP.NET MVC Framework, automating key financial workflows to significantly reduce manual operational errors.
- Participated in UX/UI design, creating user-friendly interfaces and improving overall user experience.

September 2022 - October 2022 **Vericom Company**, Software Engineer Intern, İstanbul, Turkey

- Developed and optimized websites for transportation companies, enhancing user experience and operational efficiency.
- Applied database management skills and MVC .NET framework to implement backend features with JavaScript integration.

June 2023 - September 2023 **Şikayetvar.com Bilişim**, Back End Developer Intern, Ankara, Turkey

- Engineered robust Spring Boot backend services for a high-traffic customer feedback and resolution platform, implementing secure RESTful APIs and MySQL integration.
- Enhanced system reliability through efficient CRUD operations and scalable architecture, driving overall cross-functional team productivity.

January 2024 - Present **Freelance Software Engineering**, Independent Consultant & Developer, Ankara, Turkey

- Translating diverse client business requirements into strategic technical architectures, actively bridging client-facing communication with the successful end-to-end delivery of scalable software solutions.
- Architecting mobile solutions using Kotlin and Java with Clean Architecture, ensuring maintainable and testable codebases.
- Leveraging AI-assisted development workflows to accelerate project delivery and rapidly prototype feature-rich applications.
- Designing and integrating complex RESTful APIs and real-time database structures, enhancing data synchronization and user engagement.

## Projects

September 2023 - June 2024 **1st Place – METU CENG Demo Day Senior Design Project Competition**

- PCare: Android Parental Control App** – Directed the software development lifecycle and strategically delegated tasks across a team, achieving **1st place out of 28 projects** for outstanding team leadership, design, and technical innovation. [View Project](#)
- Hidden Background Operation:** Child's app operates discreetly in the background, completely invisible to ensure seamless monitoring.
- Comprehensive Tracking:** Integrated screen tracker with YOLO object detection, keyboard activity monitoring with sentiment analysis, web history tracking, and usage time monitoring.
- Real-time Dashboard:** Separate parent app provides insightful snapshots and analytics to promote healthier digital habits and safer online environments.

## Skills

- Leadership
- Strategic Planning
- Project Management
- Data Analytics
- Agile/Scrum
- Java/Kotlin
- Spring Framework
- .NET MVC
- RESTful APIs
- Python
- JavaScript
- C/C++
- MSSQL
- Android SDK
- OOP
- Git

## Leadership & Community Engagement

Participated extensively in METU's prestigious student organizations, including the Business Club (METU BİZ), Young Entrepreneurs Society (ODTÜ GGT), and Sociological Society (METU SOC). Demonstrated strong communication, social intelligence, and teamwork skills through active involvement in collaborative events and corporate seminars.

## Languages

- English (Fluent)
- Turkish (Native)
- Arabic (Beginner)
